

INVERSE-SQUARE

INVERSE-SQUARE'S CUSTOM DEVELOPMENT PROCESS

BUILDING BETTER SOFTWARE

That business challenge that's been giving you heartburn lately...
chances are its solution hinges on technology.

For more than seven years, we've helped organizations ease workloads, streamline processes, reduce errors, costs and delays with custom software. We're a dedicated Microsoft .NET shop with a proven track record:

Below is what to expect when you partner with Inverse-Square on your custom development project.

Over 35,000
DAYS OF SUCCESSFUL
DEVELOPMENT

25%
YEAR-OVER-YEAR GROWTH

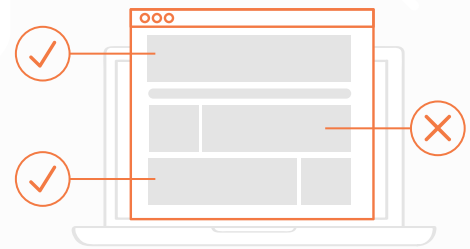

**A COMPREHENSIVE
.NET SHOP WITH
A ROBUST TEAM**

Over 100 YEARS
of collective experience

ASSESSMENT

As you evaluate options and next steps, we'll collaboratively guide you to your best solution, examining the following considerations:

- The problems you want solved
- Current processes and how they could be optimized with custom software
- Financial and resource implications
- Ramifications or impact of each option available to you

Our goal is to help you not only identify all of the above but guide you if there are other software considerations to take into account. A successful project is dependent on an effective assessment.

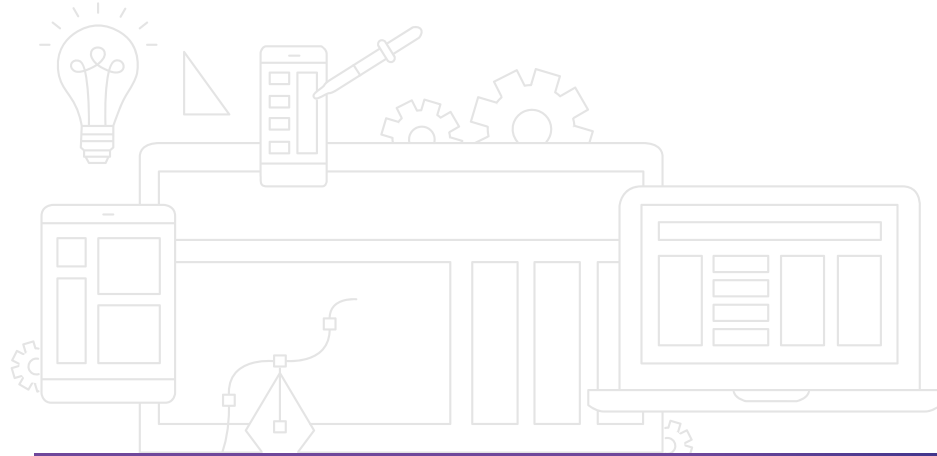

DESIGN

After the initial assessment, it's time to design the custom application. During this phase, our developers, business analysts, and project managers collaborate directly with you to create a design that solves the problems we've identified together with the ultimate goal of equipping you for long-term success.

Once we've completed the design, you'll receive full documentation of the design, including wireframes, functionality specs, and more. You'll receive all of these assets whether you choose to implement it with us or use internally, but we're confident you'll feel secure with our track record, communication, and team dynamics.

How do we approach project management for custom development? We choose the waterfall/agile hybrid for a variety of reasons. Ask us why or learn more by viewing our pros and cons [blog post](#).

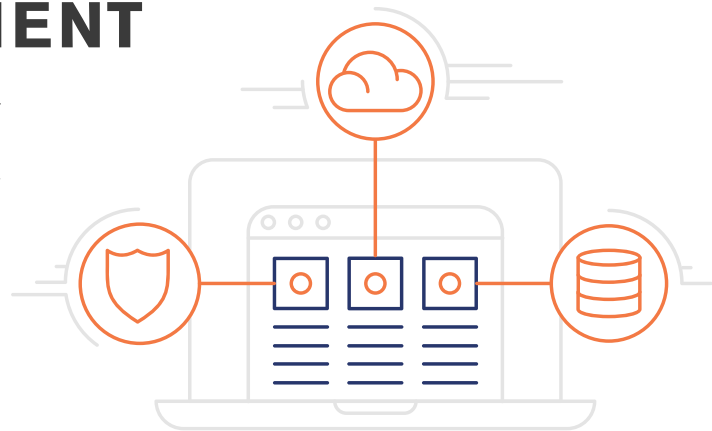

Our team are experts in .NET, java, and more, including nativescript for mobile applications. We're a full-service custom development firm with the expertise to make your app shine.

DEVELOPMENT

With the design finalized, we'll move on to development. While developers build your software, project managers will continue to clarify and demonstrate progress at every step. You'll have access and full visibility into our project management dashboard so you can see all activities and communications about your project in real time. And we take a hybrid approach to development, using the best of both agile and waterfall methodologies.

SUPPORT & ENHANCEMENT

Ensure your software grows with you and benefits your business for years to come by planning for support and enhancements now. Whether you need help maintaining your application, or need new capabilities as customer needs evolve, the deep know-how we've gained about your business and custom software means we can adapt and tackle future challenges quickly and affordably.

INVERSE-SQUARE BUILDING BETTER SOFTWARE

Inverse-Square helps businesses eradicate workflow problems and increase productivity through custom automations, real-time transparency and accountability.
